GLOW UP YOUR GARDEN

Garden lighting not only enhances the ambiance of your outdoor space but also provides functional illumination and added security. From subtle recessed spotlights along pathways to elegant wall lights and charming lanterns.
The right lighting transforms your garden into a place to enjoy day and night.
Browse through this lookbook and get inspired to create your perfect outdoor lighting setup!

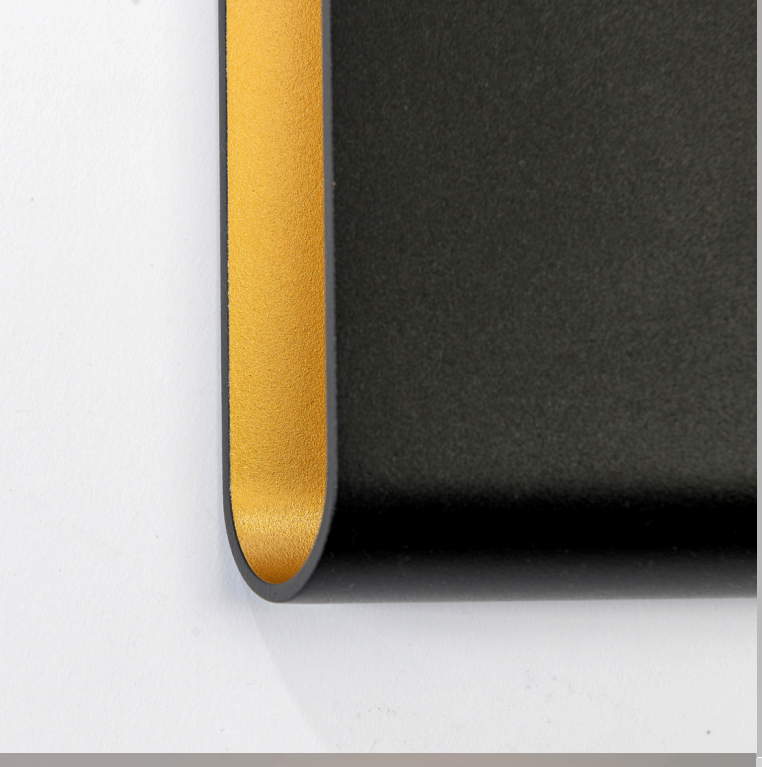

IP RATINGS: WHAT DO THEY MEAN?

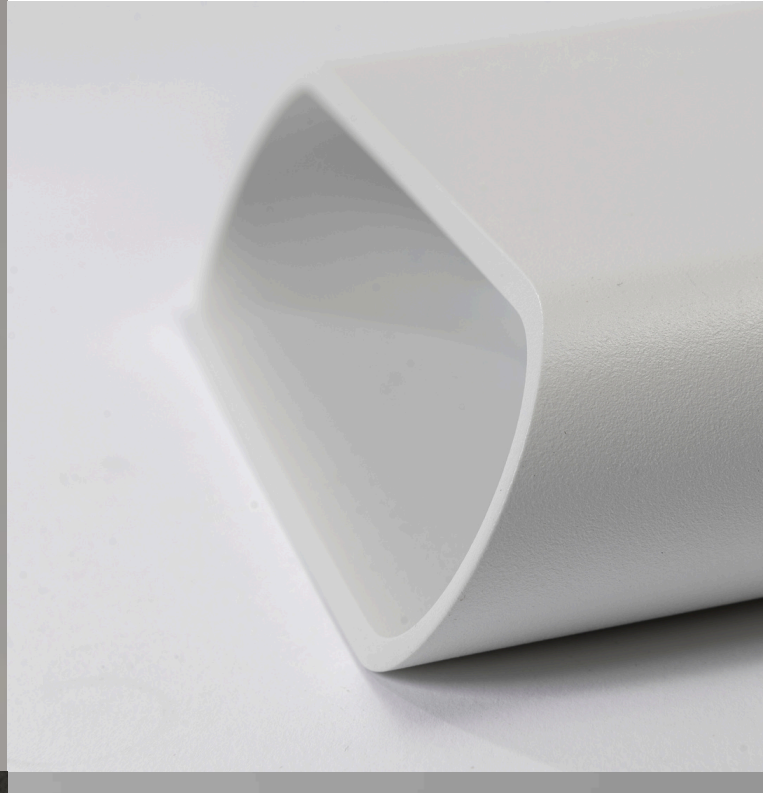

The IP (Ingress Protection) rating indicates how well a light fixture is protected against dust and water. Choosing the right IP rating ensures durability and safety.

IP23 → Protected against light rain, suitable for covered outdoor areas.
IP44 → Protected against splashing water.
IP65 → Water-resistant, ideal for areas exposed to heavy rain.
IP67 → Waterproof, can withstand temporary immersion in water.
IP68 → Fully waterproof, suitable for continuous submersion.
